

Press Kit

Welcome to our press kit! We've packaged a bundle of information about our company and guidelines to help you use our brand and assets.

To make press enquiries, or to make use of our assets in a way not covered by these guidelines, please contact press@deliogroup.com and include a visual mockup of the intended use if possible.

Our company

Since 2015, we have been at the forefront of digitally transforming the private markets landscape. Our mission is simple - we want to help a broad range of financial institutions to connect their clients with private investment opportunities quickly, transparently and compliantly.

We place highly configurable technology in the hands of the world's most respected financial institutions to create, scale and streamline their end-to-end private investment propositions. This approach enables our clients to meet the rapidly changing needs of modern investors.

Delio powered platforms are transforming the way private market opportunities are presented to potential investors. We do this by creating end-to-end digital solutions that mitigate the challenges typically associated with the private market investments industry.

Client testimonials

“Using the Delio Structuring Solution meant we had the flexibility to expand the offering to a wider audience, while all regulatory concerns were taken care of, making life easier for everyone involved.”

Douglas Hansen-Luke

Executive Chairman, Future Planet Capital

“The added functionality to have entrepreneurs add company presentation videos to the elaborate document management features proves to be especially appreciated during this pandemic, where almost all are facing lockdown restrictions in some form or another.”

Roel Bergsma

Managing Partner, Arches Capital

“The Delio team were very engaging from the offset. One of the strongest parts of Delio’s service is how responsive they are. They are constantly working to invigorate and improve the platform and that obviously bodes really well for us as clients.”

Roderick Beer

Managing Director, UKBAA

“We use Delio technology to run both our direct investment and EIS services, helping us to scale these private market propositions for our clients.”

Damian Payiatakis

Head of Impact Investing, Barclays

Logos

The Delio logo exists in four colour variations: primary, greyscale and one-colour. Use the primary version whenever possible, with the full-colour logo on a light background or the variation with white text on a dark background. Only use the greyscale variation in low production environments when a primary version cannot perform.

Primary typeface

Lato, Bold,
